

This product is used to raise the pH of pool water. pH should be maintained at 7.4 - 7.6 for optimum chlorine activity and best water quality. The ideal pH for vinyl liner pools is 7.6. Proper pH control is one of the most important factors of pool maintenance. An accurate test kit should be used to measure pH.

Low pH may cause eye irritation, corrode metal fixtures in the filtration and recirculation systems, cause pool staining and other problems.

### **DIRECTIONS FOR USE**

Read entire label and use strictly in accordance with hazard warnings and directions. To raise pH, distribute a maximum of one bag or 1 pound per 10,000 gallons of water directly into the deep end of the pool. Allow water to recirculate two to three hours, recheck pH, and repeat treatments if necessary.

Many quality test kits incorporate an alkali demand test which calculates the total amount of this product needed to bring pH into the proper range. Follow maximum one time treatment recommendations and application techniques described above. If pool capacity is unknown, retest pH prior to further additions.

**HAZARD WARNINGS: CAUTION:** Irritant. Causes skin and eye irritation. Harmful if swallowed. Avoid contact with eyes, skin or clothing. Wear goggles or safety glasses and rubber gloves when handling this product. May be irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse. For skin or eye contact, or if dust is inhaled, immediately follow First Aid statements. Do not mix with other chemicals.

### FIRST AID

**IF SWALLOWED:** Call poison control center, or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person. **IF IN EYES:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

**IF INHALED:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

### IN CASE OF MEDICAL EMERGENCY, CALL 1-800-255-3924

NOTE TO PHYSICIAN: "Probable mucosal damage may contraindicate the use of gastric lavage."

## STORAGE AND DISPOSAL

Keep this product dry in original tightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. Do not reuse container, but place in trash collection. Rinse thoroughly before discarding in trash.

NOTE: Buyer assumes all responsibility for safety and use not in accordance with directions.

CA Reg. No. 42177-50012

HGH-50-7102

Manufactured for: Alliance Trading, Inc. 109 Northpark Blvd, 4<sup>th</sup> Floor Covington, LA 70433

REV050824

SEASON

# pH UP

When pH Tests Low, Proper Addition of pH UP Will:

- Raise pH of Water to Recommended Level
- Contribute to Optimal Sanitizer
  Performance
- Protect Pool Surfaces from Staining and Corrosion
- Reduce Eye and Nose Irritation

## Active Ingredient:

Sodium carbonate.....100.0%

# KEEP OUT OF REACH OF CHILDREN CAUTION: Eye irritant.

Avoid contact with eyes, add only into water. See first aid and additional precautions on back panel

# NET WT 2 LBS (907 g)
